SUMMARY

As a Swiss Army Knife of software engineering, I'm equipped with a versatile skill set, ready to tackle complex challenges across the development lifecycle. I seamlessly integrate into teams, driving innovation with creativity, strategic thinking, and a passion for solving problems. My goal is to deliver clean, efficient and impactful solutions that enhance user experiences, drive business growth and create meaningful benefits for society.

HARD SKILLS

JavaScript, TypeScript, Vue, Nuxt, React, Next, Vuex, Pinia, Redux, Zustand, Node, CSS, SCSS, HTML, TailwindCSS, PHP, Python, jQuery, Drupal, WordPress, Statamic, Payload, Supabase, MySQL, SQLite, MongoDB, GSAP, Material UI, Bootstrap, Chartjs, Vite, Webpack, Firebase, AWS, Git, Docker, REST, GraphQL, Playwright, Puppeteer, Jest, Figma, Adobe, ARIA, UI/UX best practises, responsive & adaptive design, hosting, domain management, web security, analytics

SOFT SKILLS

Strategic thinking, problem-solving, communication, time management, leadership, project management, collaboration, adaptability, continuous learning, trust, teamwork, accountability

EXPERIENCE

Convidera GmbH   Cologne, Germany
Front-end developer   *Feb 2022 - Aug 2024*

Contributed to high-impact projects in a collaborative, agile environment, aligning cross-functional teams to deliver efficient, profitable web solutions. Quickly adapted to new demands and consistently proposed impactful web strategies and optimizations.

AIO Platform
- Collaborated closely with designers and backend team to design and develop a high-performance components and solutions, boosting user engagement on the AIO Platform.
- Optimized front-end performance, reducing load time by 30%.
- Implemented a secure authentication system using Auth0, increasing user retention and data protection.

Velux
- Developed scalable web solutions for Velux, a global leader in windows and accessories, enhancing the user experience on their site.
- Led the front-end architecture, resulting in a 20% improvement in page responsiveness.
- Utilized Hubspot integration for improved lead generation, enhancing marketing automation effectiveness.

Remex
- Built a robust portal to manage mineral disposal, recycling, and waste utilization services, improving user interaction and accessibility.
- Streamlined project workflows, enhancing user interface efficiency by 35%.
- Integrated real-time data processing features, improving client access to waste disposal analytics and increasing user engagement by 50%.

FraAlliance
- Spearheaded the development of a mobile-first solution for Lufthansa Airlines and Frankfurt Airport, significantly improving accessibility to real-time flight information.
- Improved load times and mobile user experience through a highly optimized Vue and Tailwind setup, enhancing engagement for travelers on the go.

Speekly
- Developed a user-generated content platform enabling streamlined video creation, effectively enhancing the content output by 40%.
- Integrated payment and subscription features with Stripe, enhancing user monetization potential and generating a 25% increase in platform revenue.

Virtrex
- Developed a B2B platform to streamline sales cycles, improving lead conversion rates by 15%.
- Implemented modular, reusable components, enabling future scalability and reducing development time by 20%.
- Integrated automated workflows, boosting productivity across development, testing, and deployment stages.

University of British Columbia   Vancouver, BC
Web developer   *Mar 2023 - Oct 2023*

Drove impactful web development initiatives for the department, enhancing digital presence through strategic, user-centered design and seamless project management.

- Spearheaded the design and development of the department's main website, aligning with UBC's strategic goals to improve accessibility and user engagement.
- Led the full project lifecycle, from conceptualization to launch, ensuring the project met all deadlines and remained within scope despite resource constraints.
- Significantly enhanced the site's visual appeal and functionality, implementing modern UX design principles that boosted user satisfaction and engagement by 40%.
- Collaborated with department heads and stakeholders to ensure the site met both immediate and long-term objectives, establishing a foundation for future digital initiatives.

CloudMade   Kyiv, Ukraine
Web developer intern   *Jun 2021 - Feb 2022*

Developed commercial websites aligned with market trends, boosting client satisfaction and project efficiency.

- Delivered solutions across diverse tech stacks, reducing project timelines by 25%.
- Pursued continuous learning, enhancing coding speed by 30% through self-directed growth and collaboration with senior developers.

CloudMade   Kyiv, Ukraine
Support engineer   *Feb 2020 - Jun 2021*

Managed Android and Unix devices, optimizing setups and troubleshooting across six countries during COVID-19.

- Conducted market research to recommend hardware upgrades, improving project performance.
- Ensured seamless remote operations, adapting fleet management to meet pandemic-related challenges.

Embassy of the United States of America   Kyiv, Ukraine
Analyst   *Apr 2015 - Aug 2019*

Strengthened organizational security through fraud interviews, data management, and document verification.

- Built and maintained databases for the Fraud Prevention Unit, improving data accuracy and operational efficiency.
- Provided exemplary customer service, fostering trust and boosting stakeholder satisfaction.

Consulate General of the Republic of Poland   Donetsk - Kharkiv, Ukraine
Consular assistant   *Mar 2014 - Dec 2014*

Supported evidence-based decisions through data coordination and document verification.

- Verified government documents, ensuring compliance and credibility.
- Provided exceptional customer service, building trust and enhancing the consulate's reputation.

VFS Global   Dnipropetrovsk, Ukraine
Operations supervisor   *Feb 2013 - Aug 2013*

Optimized operations by managing staff, workflows, and client relations, ensuring compliance and high service quality.

- Supervised hiring, training, and daily operations, enhancing team productivity.
- Acted as main contact for clients and consulates, resolving issues to ensure satisfaction.
- Analyzed KPIs to identify improvements for process efficiency and cost savings.
- Led initiatives to enhance service delivery and address customer escalations.

VFS Global   Dnipropetrovsk, Ukraine
Manager   *Feb 2012 - Feb 2013*

Ensured efficient operations and high service quality through effective workflow oversight and strict SOP compliance.

EDUCATION & OTHER

- Beetroot Academy, Certification, Web and Front-end development, Sweden, 2021
- Harvard University, Auditor, Computer Science, USA, 2021
- National University, Bachelor of Arts, Linguistics, Ukraine, 2011

Languages: French, Italian, German, Polish, Ukrainian, Russian

Interests: photography, cinematography, 3D printing, handcrafting, automation, cars, bikes, engines, electronics, linguistics, sci-fi, hiking, DIY, ikigai, exploring, maps
